OIA-161408-MC Master Controller

The Otis Instruments OIA-161408-MC Master Controller is an information system providing complete control and management of assets in the field; both remotely and on-site. Incorporates wired and/or wireless sensors, along with the ability to utilize multiple types of instrumentation.

The Master Controller offers secure cloud storage and VPN access via phone, laptop and desktop – providing the perfect solution for a range of instrumentation and applications.

Product Features & Specifications

- Configuration Allows for WireFree and Wired Instrumentation
- Expandable Digital Input/Output Modules
- Analog Modules of 4-20 mA, 0-5V and 0-10V
- System Utilizes an All-in-One HMI/PLC
- 10 Amp Relays Available Upon Request
- VPN Access and Control of Instrumentation
- AC, DC and Solar Powered Systems
- IoT/IIoT Through Cellular Modem and/or Direct Connection to Internet Service Provider
- Industries Served
 - Oil & Gas
 - Water
 - Wastewater
 - Manufacturing
 - Agricultural
 - Pharmaceutical Laboratories
 - Chemical Plants
 - Food & Beverage
 - Textile
